A new tool to gauge tax risk

Under the age of big data, the Chinese tax authorities have utilized new technology in taxation management (big data collection, cloud computing, Golden Tax III, and information exchange platform etc.). These digitalized system and platforms have made tax management and investigation more efficient, which also brings challenges to the taxpayers. You could be harassed by a tax audit, without knowing why. This e-seminar will explain to you how the tax radar ("Tax Doctor") works, and how you can manage the tax risk.

Speakers:

- Maggie Han | Associate Partner

She specializes in China tax consultation, with practical experience in Transfer Pricing, Corporate Income Tax, Indirect Tax, and Merger & Acquisition. Maggie provides daily consulting and compliance services including advising in preparation of transfer pricing documentation to multi-national companies.

- Sissi Shen | Senior Consultant

Sissi has been advising companies doing business in China, especially in terms of tax compliance work in China, Permanent Establishment and other tax matters.
