

Internship Experience

— Esther Zhou

“ In WTS, I can not only apply the theoretical knowledge I learned in school to practice, but also get some new knowledge in tax practice. ”

During my three-month internship in WTS, I was mainly responsible for three parts.

The first part is to assist the team in dealing with clients' work, including integrating data, writing industry analysis, translating company articles of association, annual report and TP report, filling in IIT declaration form, etc.

The second part is to carry out tax research, including collecting relevant information online and contacting tax authorities.

The third part is to complete English session and internal training, including determining the theme, preparing materials, and presenting to colleagues.

Through daily basic work, I also have a preliminary understanding of the tax consulting, which will be my valuable experience in the future career.

In addition, the working atmosphere is harmonious, and colleagues are gentle and kind. They always guide my work patiently and give me encouragement in time. It's a great honor for me to have my first internship here.
