

Megi allows you to take advantage of Cloud technology and digitalize your accounting process for new efficiencies. Megi automates many of the tedious, but necessary, accounting tasks freeing up time for our advisors to focus on making sure that your business is always on the right track.

Because we work in the cloud, you can access your reports and dashboard at anytime, anywhere. Transaction coding is easy and more accurate when accountants and managers are able to collaborate in the cloud, ensuring they are always on the same page.

WTS provides services for its clients using Megi ranging from basic bookkeeping to acting as your virtual CFO depending on the needs of your business. Let us remove your daily accounting burdens so that you can focus on what really matters to your business.

No complicated installation or maintenance required.
