

Internship Experience

— Charmaine Wang

“It couldn't be more delighted for me to have such an opportunity to have close contact with taxation practice.”

The internship experience in WTS China is my first internship experience in taxation. After this internship, I am more determined to engage in the field of finance and taxation in the future. I have gained a lot in the three months:

1. Exclusive business scope: In the past three months, I had the honor to be involved in non-trade foreign exchange payment, transfer pricing, CIT declaration, and fiscal and tax policy research, etc. During the internship, I learned experience and skills. These have enabled me to have a basic understanding of tax practice, and also stimulated my exploration interest.
2. Gained a lot from internal training, "Learning is the most important thing": During the whole internship, I particularly liked the weekly training. The content shared by seniors was useful.
3. Improvement of my business English ability: WTS is an English working environment, which is challenging for me at the beginning. But now, I am more familiar with specialized English. There are also regular English sessions, which are really helpful.
4. Cultivation of good work habits: During the whole internship, I also learned a lot of excellent work habits, such as grasping the core information to be conveyed on the PPT presentation, being sure to double check each job before submitting and so on. These are valuable assets.

Above all, the working atmosphere in WTS was particularly pleasant. The colleagues were familiar with each other and gave me a lot of help at work.

Wishing WTS China all the best.
