Germany is currently pushing a lot of legislative measures in taxation which have a huge impact on inbound and outbound structures. Most measures aim at preventing base erosion and profit shifting. However, through some initiatives, Germany modernizes its tax law and ends overshooting effects to the detriment of taxpayers. During the webinar, Dr. Gabriele Rautenstrauch (International Tax Expert) and Prof. Dr. Axel Nientimp (Transfer Pricing Expert) will give you an update on the recent developments in German tax law, especially:

- Update of legal framework for Transfer Pricing, including the implementation of the DEMPE concept
- Update of CFC rules
- Revision of the anti-treaty shopping rule
- Introduction of new anti-hybrid regulations
- Update of tax group taxation (Organschaft)
- Further measures against tax havens

The webinar is primarily addressed to tax experts from the tax departments of multinational groups with investments in Germany (inbound), but also covers topics which are relevant for German headquarters (outbound).
