

## Path of Learning and Growth

### “Customs / Tax Essentials of New Trading Models & Supply Chains”

WTS China has recently run a successful supply chain training in Shanghai on 23 April. The event was organized by German Mechanical Engineering Commercial Services (GMECS) and chaired by WTS China.

Attendees were given an overview of China’s developing new trading models and alerted on the China customs and tax challenges.

The training was spoken by three WTS representatives: Martin Ng, managing partner; Conrad Lin, senior manager; and Todd Jin, senior consultant.

The training session has discussed a variety of subjects, which include the following topics:

- Development of import and export in China;
- Current status of new trading models;
- Types of new trading models;
- Customs and tax essentials.
