On January 19 2021 at 5 PM, WTS Global, Atlas and Tiberghien will jointly conduct a high-profile webinar on the first experiences with the Digital Services Taxation based on the evolution and implementation of the French DST. One of our keynote speakers, at the invitation of Dominique Villemot, will be **Christophe Pourreau, Directeur de la législation fiscale** at the French Ministry of Finance. Christophe Pourreau is in charge of drafting all tax laws (including the French DST) and negotiating inside the OECD and EU. He reports directly to the Minister of Finance, Bruno Le Maire.

This webinar is brought to you by a group of WTS Global tax experts led by Atlas and Tiberghien, which are constantly monitoring the developments on digital taxation issues worldwide. More specifically, a new group called the **DST expert team** has been organised to monitor all the developments on the newly (to be) introduced Digital Service Tax (DST) in the EU and worldwide. The team is already advising numerous clients on these new challenges, mainly US multinationals.

Agenda:

- **French DST update:**
With Dominique Villemot and Nathalie Lay
- **DST (practical) experiences with Mr. Pourreau and others:**
Sharing insights on drafting the DST law, how to target taxable persons, filing and paying the DST, practical experiences and difficulties so far
- **European DST and OECD talks with Mr. Pourreau:**
Sharing views on the global developments with respect to the European DST and Pillar I.
- **Q&A**

In case of any questions or comments please contact us under: GlobalTaxOnAir@wts.de.
